

FERRARI

- World Leaders in Solar Protection

Blinds and awnings for internal and external applications

Case Study

A game lodge perched high on the side of a ridge with panoramic views over the bush and plains below. The architects wanted to provide privacy and protection from the sun without obscuring the view from the floor to ceiling windows.

Fabric : **Soltis 86®**

Blind maker : AC Screens

Solution : **Soltis 86®** blind material

The architect selected **Soltis 86®** from the range of solar protection materials manufactured by Ferrari. This material filters out approximately 86% of sunlight making the room cooler without the glare. The weave allows outside visibility while affording privacy to the inside viewer. The hand held controls allow each individual blind to be quickly and quietly dropped from the ceiling. The blinds may be stopped at any stage during descent allowing the operator to respond to movements of the sun. These blinds run in tracks fixed onto the pillars without any glass doors or windows effectively making a material barrier able to withstand the prevailing wind. The good looking blinds complement the rustic sophistication of the lodge.

Visibility toward the outside

Transparency and light

Soltis 86® maintains privacy and screens out sun glare, while at the same time retaining outward visibility which is particularly important in this application.

Soltis 86® filters and regulates the level of natural light according to your requirements. When the blinds are extended you do not feel enclosed as **Soltis 86®** offers a remarkable degree of transparency, providing outward visibility that cannot be matched.

Won't sag

Tear resistance

Ultra Stable & Tear resistant

Soltis 86® is a textile designed according to an exclusive and patented process which ensures that the textile will not lose its shape or its inherent physical strength despite the tensions generated by wind, rain, hail or other climatic conditions. For this reason, **Soltis 86®** is preferred by architects and specifiers the world over for large exterior panels.

Precontraint

Manufactured using the exclusive patented Precontraint Ferrari technology, the Soltis textiles are maintained under tension throughout the entire production cycle. The resulting level of dimensional stability is extremely high, meaning the textiles do not deform during installation or over time.

PRÉCONTRAIT FERRARI®: TECHNICAL TEXTILES

Fire Retardant

Fire retardant **Soltis 86®** is not inflammable and will only smoulder in the immediate presence of flames

Easy Maintenance

Thanks to its anti-dirt treatment, maintenance of the Soltis textiles merely involves a wash with water and a mild detergent. There is no mould, rotting or discolouration caused by moisture.

Fungistatic treatment

5 Year Warranty - backed by one of the leading manufactures in the world.

Back-up and support from trained and experienced local suppliers.
