

FERRARI

- World Leaders in Solar Protection

Blinds for internal and external applications

Case Study

This large family home is situated high above Knysna with spectacular views over the river estuary. The architect wanted to provide adequate protection from the sun without obscuring the view.

Fabric : **Soltis 86®**

Blind maker : AC Screens

Solution : **Soltis 86®** blind material

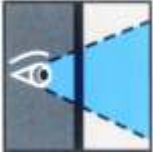

The architect selected **Soltis 86®** from the range of solar protection material manufactured by Ferrari. This material filters out approximately 86% of sunlight, making the room cooler without the glare. The weave allows outside visibility while affording privacy to the inside viewer.

The hand held controls allow each individual blind to be quickly and quietly dropped from the ceiling. The blinds may be stopped at any stage during the descent allowing the operator to respond to the movement of the sun. These blinds are loose, hanging on the inside of the sliding glass windows.

These good looking blinds make a substantial difference to the liveability of this home while complementing the modern design. They do not obstruct the views but allow them to be enjoyed at any time of the day.

Transparency and light

Visibility toward the outside

Soltis 86® maintains privacy and screens out sun glare, while at the same time retaining outward visibility which is particularly important in this application.

Soltis 86® filters and regulates the level of natural light according to your requirements. When the blinds are dropped you do not feel enclosed as **Soltis 86®** offers a remarkable degree of transparency, providing outward visibility that cannot be matched.

Ultra Stable & Tear resistant

Won't sag

Tear resistance

Soltis 86® is a textile designed according to an exclusive and patented process which ensures that the textile will not lose its shape or its inherent physical strength despite the tensions generated by wind, rain, hail or other climatic conditions. For this reason, **Soltis 86®** is preferred by architects and specifiers the world over for large exterior panels.

Preconstraint

Manufactured using the exclusive patented Preconstraint Ferrari technology, the Soltis textiles are maintained under tension throughout the entire production cycle. The resulting level of dimensional stability is extremely high, meaning the textiles do not deform during installation or over time.

PRÉCONTRAIT FERRARI®: TECHNICAL TEXTILES

Fire Retardant

Fire retardant **Soltis 86®** is not inflammable and will only smoulder in the immediate presence of flames

Easy Maintenance

Thanks to its anti-dirt treatment, maintenance of the Soltis textiles merely involves a wash with water and a mild detergent. There is no mould, rotting or discolouration caused by moisture.

5 Year Warranty - backed by one of the leading manufactures in the world.

Back-up and support from trained and experienced local suppliers.

synchron

Official supplier of **FERRARI** fabric
