Blinds and awnings for internal and external applications

Case Study Large restaurant that needed to screen off an area that was not continuously in use.

Fabric : **Soltis 86®**

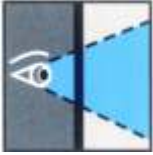

Blind maker : Super Tracks

Solution : Soltis 86® blind material

Soltis 86® blind material was selected for the application of the One & Only hotel in the Waterfront, Cape Town. Controlled by hand-held remote controls, the blinds were installed onto the ceiling of this prestigious restaurant but can be dropped quickly and silently when required so as to divide the restaurant into smaller areas. Guests can see through the woven fabric which allows in light but also filters out direct sunlight thus protecting furniture and introducing a cooler, shadier atmosphere. The technique of manufacture also causes the material to hang flat without deforming.

Transparency and light

Visibility toward
the outside

Soltis 86® maintains privacy and screens out sun glare, while at the same time retaining outward visibility which is particularly important in this application.

Soltis 86® filters and regulates the level of natural light according to your requirements. When the blinds are dropped you do not feel enclosed as **Soltis 86®** offers a remarkable degree of transparency, providing outward visibility that cannot be matched.

Ultra Stable & Tear resistant

Won't sag

Tear resistance

Soltis 86® is a textile designed according to an exclusive and patented process which ensures that the textile will not lose its shape or its inherent physical strength despite the tensions generated by wind, rain, hail or other climatic conditions. For this reason, **Soltis 86®** is preferred by architects and specifiers the world over for large exterior panels.

Preconstraint

Manufactured using the exclusive patented Preconstraint Ferrari technology, the Soltis textiles are maintained under tension throughout the entire production cycle. The resulting level of dimensional stability is extremely high, meaning the textiles do not deform during installation or over time.

PRÉCONTRAIT FERRARI®: TECHNICAL TEXTILES

Fire Retardant

Fire retardant **Soltis 86®** is not inflammable and will only smoulder in the immediate presence of flames

Easy Maintenance

Thanks to its anti-dirt treatment, maintenance of the Soltis textiles merely involves a wash with water and a mild detergent. There is no mould, rotting or discolouration caused by moisture.

Fungistatic treatment

5 Year Warranty - backed by one of the leading manufactures in the world.

Back-up and support from trained and experienced local suppliers.

synchron

Official supplier of **FERRARI** fabric
